Innovative midsize companies have already solved numerous challenges in the product development process with the product life cycle management. But the potential in the downstream processes is still not completely bailed out. Especially in the maintenance area are a lot of sales and competition potentials to be unlocked. This is where ICP Solution's Accelerate solution helps.

## ICP Solution–Maintenance–Accelerate–Package (IMA)

### For further information:

ICP Solution GmbH  
Ida-Ehre-Platz 12  
D-20095 Hamburg

Tel.: +49 40 303 7508-0  
Fax: +49 40 303 7508-29

ICP Solution GmbH  
Untere Grubenstraße 1  
CH-5070 Frick  
Tel.: +41 62 871 1919  
Fax: +41 62 871 2929

### Interesting for companies in:

- Mechanical Machinery
- Plant Engineering
- Special Vehicle Construction
- Defense Industry
- Medical Devices

### Application range:

- Product maintenance / spare parts
- Extensions / Upgrades
- Bug-fixes
- Enhancements

### The solution:

The Accelerate Solution ICP Maintenance Accelerate (IMA) creates, maintains and supervises a customer-specific development structure. A scheme of components, assemblies of constructions or machines is available at any time. With this knowledge it is easy to operate when service is needed and also to achieve profit through additions or improvements.

### Functions:

- Generation of the initial "as-built" structure out of the engineering bill of material
- Creation of unique customer product structure "as-maintained"
- Change function out of the "as-maintained"
- Change processes (Maintenance Work Order)
- Comparison functions

### Why using PLM for maintenance structures:

In contrast to commercial application software, in PLM exists a direct shortcut to your engineering structures. Therefore the completeness of the bills of material is guaranteed, a direct comparison of the particular structures is possible and there is a direct link to the associated documents.

### Benefits:

With IMA you can generate more sales in your service business. With the knowledge of any components of your customer's use a service business can be built up. Therefore you can offer your customers individual, specific innovations or high-performance upgrades.

### Implementation bundle:

The IMA Solution contains following performances:

- IMA-PLM add-in solution
- Installation of the solution
- Workshop on how to use
- Basic adjustments
